

## Containers, trailers and chassis tracking with theft protection

### Product overview

FleetUp 4CJ provides GPS location tracking and theft protection for large assets such as containers, trailers and chassis.

The 4CJ is the industry's only tracking and security device that provides true, real-time security protection.

Its SmartLock technology immediately sends text and email messages to the FleetUp platform if any tampering or unexpected movements are detected.

The 4CJ provides an unrivaled level of cargo security and theft protection for containers, trailers and chassis from their point of origin to their destination.
