

## GPS tracking for non-OBD heavy equipment

### Product overview

FleetUp 4WT is specifically designed for tracking and monitoring heavy equipment that does not have an OBD interface.

FleetUp 4WT's ruggedized, weatherproof enclosure ensures that it can continue to operate under harsh conditions including heavy equipment vibrations, extreme weather, and repeated hard impacts.

The 4WT helps fleet managers maximize the utilization of their valuable heavy equipment while protecting it from unauthorized use or theft.

**FleetUp 4WT equipment tracking device**

### Key features

- GPS updated every 10 secs
- Hardwired installation
- IPX5 rated enclosure
- Geofence alerts
- Store and forward technology
- FleetUp web app support

### Key benefits

- “Best in Class” location tracking
- No recharging required
- Operates in harsh environments
- Reduced risk of theft
- Operates outside network coverage
- Remote management from anywhere

**Heavy equipment**

FleetUp 4WT tracks GPS location and helps prevent theft of heavy equipment

**Specifications**

<b>Dimensions (in)</b>	4.5(W) x 2.4(L) x 1.3(H)	<b>6-axis IMU</b>	Driving behavior detection
<b>Weight</b>	7.0 oz	<b>Working voltage</b>	9-36VDC
<b>Working temperature</b>	-22°F ~ +158°F	<b>Storage</b>	2MB FLASH up to 24,000 GPS data storage
<b>Storage temperature</b>	-40°F ~ +185°F	<b>GPS</b>	Channels: 66 Sensitivity: -165dBm Accuracy: 16 ft CEP
<b>Humidity</b>	5% ~ 95% / No fog	<b>Cellular (US)</b>	<ul style="list-style-type: none"> <li>• LTE-FDD: B2/B4/B5/B12/B13</li> <li>• WCDMA: B2/B4/B5</li> </ul>
<b>Working current</b>	Max: <200mA@13.8/27.6VDC 3.7V/160mA
