

Portable asset tracker

Product overview

FleetUp 5TA tracks and prevents the theft of valuable portable assets like containers, trailers, construction, equipment and packages across the entire supply chain.

FleetUp 5TA real-time tracking provides GPS updates every 10 seconds ensuring that you know the exact location of your assets at all times.

Its small size and magnetic backing enables simple "no tools" installation that can be done in a matter of minutes.

The 5TA is the ultimate solution for tracking and protecting portable assets that are highly susceptible to loss or theft.

FleetUp 5TA portable asset tracker

Key features

- GPS updates every 10 secs
- Rechargeable battery
- IP65 rated
- Wireless operation
- Geofence alerts
- Small physical footprint
- FleetUp web app support

Mode 1

- Sends data to your platform when moved or after a pre-selected time duration.
- Battery life before recharging is needed: 30 days if unit is set to real-time 10 second locates.

Key benefits

- "Best in Class" location tracking
- Long-term battery life
- Works in hostile environments
- Simple, "no tools" installation
- Quick recovery of lost or stolen assets
- Easy to conceal and prevent tampering
- Remote management from anywhere

Mode 2

- Sends data to your platform after a pre-selected time duration has passed - for example, every hour, every 12 hours, once a day, or any other duration you choose.
- Battery life before recharging is needed: 20 months if located once per day.

Trailers, containers and chassis

FleetUp 5TA pinpoints the exact location of portable assets ranging from packages to trailers and chassis
