

## FleetUp and Monday.com integration

### Product overview

Fleet location data is now visible and shareable via one of the world's most-trusted project management platforms. FleetUp users can create unique Monday.com boards for customers and partners, each with its own customizable set of real-time fleet data.

This powerful tool can be used in many ways. Fleet owners that already use Monday.com can now get the information they need without switching between applications. Fleet owners that want to share data with partners who use Monday.com can share data via that partner's preferred platform.

FleetUp and Monday.com's integration will reduce internal confusion, improve customer support, and keep complicated multiple-partner projects running smoothly.

### Key features

**By sharing FleetUp information in Monday.com, FleetUp users can:**

- Integrate FleetUp data into existing Monday.com workflows
- Share real-time delivery status with customers
- Provide a premier support service for customers
- Share real-time project data with partners
- Manage multi-partner projects more efficiently
- Enhance collaborations
- Minimize miscommunication

### Key benefits

**Choose to share any combination of data:**

- GPS location of all assets on Google maps
- Engine diagnostic trouble codes
- Vehicle speed
- Driver contact information
- Remaining HOS hours

“

When we share data and FleetUp's 99% accurate ETAs, it makes our customers a lot less worried.

”
