

# 4WT

GPS tracking for non-OBD heavy equipment

## Product overview

FleetUp 4WT is specifically designed for tracking and monitoring heavy equipment that does not have an OBD interface.

FleetUp 4WT's ruggedized, weatherproof enclosure ensures that it can continue to operate under harsh

conditions including heavy equipment vibrations, extreme weather, and repeated hard impacts.

The 4WT helps fleet managers maximize the utilization of their valuable heavy equipment while protecting it from unauthorized use or theft.

## Hardware features

- Hardwired installation
- Small footprint
- Ruggedized, IPX5 enclosure
- Easy to conceal
- Operates in harsh environments

## Software features

- GPS updates every 10 secs
- Engine health monitoring
- Store and forward technology
- Suspicious movement detection
- Dynamic geofences
- Custom alerts
- FleetUp mobile app support
- "Best-in-class" location tracking
- Helps lower vehicle maintenance costs
- Helps reduce fuel costs
- Protects against theft
- Optimizes safety and efficiency
- Keeps staff better informed and productive
- Remote management from anywhere

## Heavy equipment

FleetUp 4WT tracks GPS location and helps prevent theft of heavy equipment.

## Specifications

<b>Dimensions (in)</b>	4.5(W) x 2.4(L) x 1.3(H)
<b>Weight</b>	7.0 oz
<b>Working temperature</b>	-22°F ~ +158°F
<b>Storage temperature</b>	-40°F ~ +185°F
<b>Humidity</b>	5% ~ 95% / No fog
<b>Working current</b>	Max: <200mA @13.8/27.6VDC 3.7V/160mA
<b>6-axis IMU</b>	Driving behavior detection
<b>Working voltage</b>	9-36VDC
<b>Storage</b>	2MB FLASH up to 24,000 GPS data storage
<b>GPS</b>	Channels: 66 Sensitivity: -165dBm Accuracy: 16 ft CEP
<b>Cellular (US)</b>	<ul style="list-style-type: none"><li>• LTE-FDD: B2/B4/B5/B12/B13</li><li>• WCDMA: B2/B4/B5</li></ul>
