

FleetUp Customer Experience

Expert onboarding and proactive customer care

Simple onboarding

Getting started with FleetUp is easy. Our videos and tutorials will walk you step by step through the onboarding so you can get started at your own pace. If you require additional help, you can schedule a time for a FleetUp representative to answer your questions and introduce you to your FleetUp software and make sure your devices are installed correctly.

Hours of support

At any time, if you have any questions, you can reach FleetUp customer support via phone, email, or online chat. Our support team answers 97% of phone calls and responds to emails within an average of 30 minutes. We're always here to help.

Proactive customer care

After you've been onboarded, your FleetUp representative continues to check in and make sure you're getting everything you need. During quarterly health checks, you'll discuss how FleetUp can help you achieve your big-picture business goals and solve any problems you might be having.

Product upgrades

FleetUp's software never becomes obsolete. With engineers working in Silicon Valley, Los Angeles, and around the world, we push our technology to the cutting edge. Our platform is continuously growing smarter and more powerful, with regular product enhancements released every month.

Software integration

FleetUp's software is built with an open API, so it can be integrated with the current systems your fleet uses. Contact our support line and set up a time to talk to an engineer who will tailor the FleetUp platform to fit your unique needs.
