

FleetUp Driver

HOS compliance with a 24/7 cloud-based office for your drivers

The FleetUp Driver mobile app is a compliance solution for your drivers. It's both a tool for avoiding HOS fines and a way to connect your on-the-road team to your in-the-office team.

Unlike other ELD apps, FleetUp Driver is made with drivers in mind. Its tutorial voice assistant teaches drivers how to navigate its interface, while its HOS auditor voice assistant identifies potential HOS logging errors and suggests corrections. These mobile-friendly features help drivers avoid the kind of technical mistakes that lead to HOS fines.

FleetUp Driver also gives your drivers a cloud-based office that goes everywhere they go. No matter where they are, they can exchange messages, scan and upload files, and more. Keep your team connected with the FleetUp Driver app.

Key features

Android & iOS

Download on Android or iOS devices from Google Play or the Apple App Store.

English & Spanish

Use your preferred language according to the English or Spanish settings on your mobile device.

Tutorial voice assistant

Learn how to navigate the app with an automated teacher.

Key benefits

HOS voice assistant

Check for potential logging errors and receive alerts

HOS Duty Status

Quickly check and update HOS Duty Status

QR codes

Scan QR codes to quickly and correctly identify assigned vehicles

2-way chat

Facilitate 2-way chat between drivers and dispatch

Driver Vehicle Inspection Reports (DVIR)

Perform vehicle inspection reports directly from the app

Driver logs

Edit driver logs to make sure logs are accurate in order to meet compliance requirements

Driver's score card

View details about your driver score percentage and the driving events that contributed to the score
