

FleetUp Overview

Comprehensive fleet management software

Product overview

FleetUp offers the industry's only true all-in-one solution. Users can track and manage everything from vehicles to equipment to cargo to employees to job sites. And they can do it via both desktop and mobile devices. The FleetUp Admin mobile app makes it easy to control your operation from anywhere.

With FleetUp, users get a real-time look at every single inch of their operation. They also get a big picture view that shows them how they can make their business more efficient as a whole. Custom alerts, available via SMS, email, or on-screen pop-up, deliver precisely tailored information to each team member. Everyone is kept up-to-date on the information they need to know; no one is overwhelmed by alerts that aren't their responsibility.

Key features & benefits

AI dashcams

Stream real-time video. Accident footage automatically uploads to the cloud. Voice assistants prevent reckless driving.

GPS tracking

Real-time monitoring updates every 10 seconds. Every asset is visible on a single screen accessible via desktop and mobile.

Theft and loss prevention

Receive the industry's only break-in alerts. Engine shutoff stops thieves in their tracks. Anti-theft features keep assets safe.

Engine and vehicle health

Receive real-time engine health alerts. Centralize all maintenance records on one cloud platform.

Client management and collaboration

Send live ETAs to customers. Collaborate with partners by sharing custom sets of real-time data.

Employee management

Voice assistants prevent reckless driving. Safety scores pinpoint dangerous drivers. Remote job assignments make managing easy.

Compliance

Voice assistants help remove errors from HOS logs. An easy-to-use interface makes FleetUp's HOS app a driver favorite.

Fuel management

Reduce fuel use by 10% or more. See which vehicles are wasting fuel and why - due to idling, high RPM, or other factors.

Climate monitoring

Monitor the temperature and humidity of reefers. Put multiple trackers in different locations to see an entire reefer's climate.

Fleet software

Do everything with powerful, real-time software, available on mobile and desktop. Keep up-to-date in real time with custom alerts.
