FLEETUP

FleetUp Professional Services

FleetUp Professional Services will run your telematics software for you. We provide you with your own personal telematics expert. We also perform day-to-day telematics tasks and tailor FleetUp's software to fit your unique needs.

Your FleetUp expert will:

- Set up your telematics platform. Create user accounts and customize settings.

- Build and maintain geofences to monitor worksites, loading docks, and more.

- Create personalized text and email alerts for each of your managers.

- Monitor staff. Report unproductive and unsafe behavior.

- Create maintenance schedules and monitor mechanical problems.

- Review FleetUp's automated reports and suggest profit-boosting strategies.

For a monthly cost-per-device cheaper than a coffee-and-sandwich lunch, FleetUp Professional Services is the best budget-friendly way to add a telematics expert to your team.
