

Mini Asset Tag

A Compact, Long-Life Asset Tag for Theft Prevention

Product overview

The Mini Asset Tag is a compact tracking device designed to help monitor and protect high-value items. It leverages a global crowdsourced network to determine location, removing the need for a SIM card while still delivering reliable location visibility worldwide.

With an ultra-low-power design, the Mini Asset Tag can operate on its internal battery for up to 30 months. Its small, lightweight form factor and included 3M double-sided adhesive make it easy to mount discreetly inside vehicles, luggage, or other assets where traditional trackers may not fit.

Key features

Flexible Installation

The device can be installed via a 3M double-sided adhesive lope or just squeeze it into your valuables, making it suitable for various scenarios.

Low power consumption

The internal battery can power the device to operate as long as 30 months.

Geofence Alert

A virtual boundary can be set on the platform, you'll be notified when an asset under tracking leaves or enters the boundary.

Global Availability

The device can be used anywhere in the world because it doesn't depend on cellular networks for communication and the different frequency bands are no longer a problem.

Wide Operating Temperature

The device can operate correctly between -4°F and +158°F.

Specifications

Dimensions	1.90 × 1.50 × 0.54 in
Color	Black
Switch	Toggle switch
Battery	1100mAh Li-MnO2 Battery
Operating temperature	-4°F to +158°F
